Bachelor's of Information Technology (R)

### University Of The People— Degree

Bachelor's in Computer Science (R)

## SKILLS

Programming Languages( Java, Python, JavaScript, C#, PHP)

SQL Programming

GIT and GitHub Web

Development Excel

## EXPERIENCE

### Scienter Technologies

#### Software Engineer - Intern

AUGUST 2025 – JANUARY 2026

As an intern at Scienter Technologies, I am gaining hands-on experience in software development and technology solutions. My role involves collaborating with the development team on real-world projects, contributing to system design, coding, testing, and documentation. Through this internship, I'm enhancing my technical and analytical skills while learning industry-standard practices in project development and teamwork.

## ADDITIONAL

- + Have a front-end developer certificate from Meta.
- + I have finished the trainee full-stack development course from the University of Moratuwa.

## PROJECTS

### 1. Phone Book App in Python Flask + SQLite

A web application where users can **add, view, update, and delete contact entries** (name and phone number). And also, we can register a new user using email and password, and we can log in. This is also a **CRUD application** (Create, Read, Update, Delete).

## LANGUAGES

Tamil - Fluent

English - Good

Sinhala - Manageable

### 2. Personal Portfolio

A modern, responsive **personal portfolio website** built using **HTML, CSS And JS** to showcase my projects, skills, and contact information. The application follows a clean design and is fully responsive across devices, making it ideal for job applications and online presence as a software engineer.

### 3. Hoodie Store – Static Website Using HTML & CSS

The **Hoodie Store** is a simple, stylish, and responsive **e-commerce landing page** created using only **HTML and CSS**.
